PROFESSIONAL SUMMARY

Software Engineering undergraduate with practical experience building full-stack web and desktop applications using React, Spring Boot, Java, and Python. Delivered projects in healthcare, e-commerce, productivity, and machine learning with a focus on clean implementation, usability, and real-world impact. Seeking internship and entry-level software engineering opportunities in internationally collaborative teams.

TECHNICAL SKILLS

Programming Languages: C, Java, Python, JavaScript

Frontend: HTML, CSS, React, Tailwind CSS

Backend: Spring Boot, Node.js

Data and ML: Pandas, NumPy, Logistic Regression

Databases: PostgreSQL, Oracle, SQLite

Tools: Git, GitHub, Linux, VS Code, IntelliJ IDEA, PyCharm, WebStorm

PROJECTS

VitaBridge - Online Healthcare Platform

Technology: React, Spring Boot, PostgreSQL

Academic Project

Full-stack healthcare platform for secure doctor-patient workflows, digital records, and AI-assisted support.

- Developed a full-stack digital healthcare platform connecting doctors and patients through secure registration and profile management.
- Implemented appointment booking, telemedicine workflow, prescriptions, report management, notifications, and ratings.
- Integrated AI-assisted symptom checking and OCR-based medical data extraction for improved user convenience.

Repository: github.com/Emam1523/VitaBridge

SmartMail - Spam Mail Detection System

Technology: C, Logistic Regression

Academic Project

End-to-end spam detection pipeline that cleans email text and classifies messages with logistic regression.

- Built an end-to-end spam detection pipeline for cleaning email text and extracting relevant features.
- Implemented logistic regression-based classification to detect spam messages from real datasets.

Repository: github.com/Emam1523/SmartMail

E-Commerce Frontend Platform

Technology: React

Industry Project

Responsive e-commerce frontend for product browsing, category navigation, and smooth cross-device usability.

- Designed and developed a responsive e-commerce frontend for product listing, category browsing, and intuitive navigation.
- Optimized layout and component structure for mobile and desktop usability.

Repository: Project is already deployed.

QuickPOS - Desktop Point of Sale Application

Technology: Java, JavaFX, Maven, SQLite

Academic Project

Desktop point-of-sale application for managing billing, sales transactions, and inventory records.

- Developed a desktop POS application to manage sales transactions, billing, and inventory records.
- Designed a clean transaction flow to improve cashier efficiency and reduce operational friction.

Repository: github.com/Emam1523/QuickPOS

Smart Service Booking

Technology: HTML, CSS, JS, Spring Boot, PostgreSQL

Academic Project

Web application for booking smart services with a user-friendly frontend and backend integration.

- A web application for booking and managing smart services, featuring a user-friendly interface and seamless integration with backend systems.

Repository: github.com/Emam1523/Smart-Service-Booking

Ramadan Timing - Prayer Time Management Web App

Technology: HTML, CSS, JavaScript

Industry Project

Location-based Ramadan schedule app with district-wise Sehri and Iftar timing support.

- Created a location-based web app providing district-wise Sehri and Iftar schedules with a dynamic Ramadan calendar.
- Built for practical organizational use with clear, accessible user interaction patterns.

Repository: Project is already deployed.

PharmaQR-Portal

Technology: React, Node.js, PostgreSQL

Industry Project

PharmaQR-Portal is a web app for managing and sharing pharmaceutical files via QR-linked folders and books, featuring an admin dashboard, secure passcode access, and file/folder management.

- Built QR-linked folder and book workflows for organized pharmaceutical file sharing.
- Added secure passcode access, admin controls, and file/folder management.

Repository: Project is already deployed.

BCO Admit Card Generator

Technology: Spring Boot

Industry Project

Spring Boot application that reads student CSV files, assigns roll numbers, and generates personalized admit card PDFs. Supports batch PDF generation and emailing, with a REST API for ad-hoc operations and CSV-driven automation.

- Automates roll assignment and personalized admit card PDF generation from student CSV files.
- Supports batch PDF generation, emailing, REST-based operations, and CSV-driven automation.

Repository: Project is already deployed.

EDUCATION

Bachelor of Science in Software Engineering (BSSE)

Institute of Information Technology, University of Dhaka

Current

CGPA: 3.54 / 4.00 (up to 4th semester)

Higher Secondary Certificate (Science)

Government Rajendra College, Faridpur

2022

GPA: 5.00 / 5.00

Secondary School Certificate (Science)

Faridpur High School, Faridpur

2020

GPA: 5.00 / 5.00

ACHIEVEMENTS AND ACTIVITIES

- Best Player, IIT Football Team (2024)
- Best Player, 2nd Division Football Tournament, Faridpur (2022)
- Center Back, IIT Football Team
- Batsman, IIT Cricket Team
