PROFESSIONAL SUMMARY

Creative and detail oriented Software Engineer with hands-on experience in developing modern web applications and backend services. Driven by problem-solving, performance optimization, and creating intuitive digital experiences that deliver business value.

EDUCATION

Bachelor of Science in Software Engineering

Institute of Information Technology, University of Dhaka
CGPA: 3.55 / 4.00 (2023 - Present)

Higher Secondary Certificate (Science)

Government Rajendra College, Faridpur
GPA: 5.00 / 5.00
YEAR: 2022

TECHNICAL SKILLS

Programming Languages: C, Java, Python, JavaScript, TypeScript

Frontend: HTML, CSS, React, Angular, Tailwind CSS

Backend: Spring Boot, Express.js

Databases: PostgreSQL, Oracle, SQLite

Tools: GitHub, VS Code, IntelliJ IDEA, PyCharm, WebStorm

PROJECTS

RTGS - Real Time Gross Settlement System

Internship Project

Technology: Spring Boot, Angular, Oracle

Microservices based RTGS system developed during internship at Leads Corporation Limited.

- Developed Spring Boot backend microservices and integrated Oracle database services.
- Built the Angular frontend and connected it with the backend APIs.

Organization: Leads Corporation Limited

BEFTN - Bangladesh Electronic Funds Transfer Network System

Internship Project

Technology: Spring Boot, Angular, Oracle

Microservices based BEFTN system developed during internship at Leads Corporation Limited.

- Developed Spring Boot backend microservices and integrated Oracle database services.
- Built the Angular frontend and connected it with the backend APIs.

Organization: Leads Corporation Limited

VitaBridge - Online Healthcare Platform

Academic Project

Technology: React, Spring Boot, PostgreSQL

Full-stack healthcare platform for doctor-patient workflows and digital records.

- Built secure doctor-patient registration, appointments, telemedicine, and prescription workflows.
- Added digital report management, notifications, ratings, AI symptom checking, and OCR support.

Repository: github.com/Emam1523/VitaBridge

Ramadan Timing - Prayer Time Management Web App

Industry Project

Technology: HTML, CSS, JavaScript

Ramadan schedule app with district-wise Sehri and Iftar timings.

- Created a location-based interface with district-wise schedules and a dynamic calendar.
- Designed clear and accessible interactions for practical organizational use.

Repository: Project is already deployed.

PharmaQR-Portal

Industry Project

Technology: React, Express.js, PostgreSQL

Web app for sharing pharmaceutical files through QR-linked folders and books.

- Built QR-linked folder and book workflows for organized pharmaceutical file sharing.
- Added admin controls, secure passcode access, and file management.

Repository: Project is already deployed.

BCO Admit Card Generator

Industry Project

Technology: Spring Boot

Spring Boot application for automated admit card generation from student CSV files.

- Automates roll assignment and personalized PDF generation from student data.
- Supports batch generation, email delivery, REST operations, and CSV automation.

Repository: Project is already deployed.

ACHIEVEMENTS AND ACTIVITIES

- Best Player, IIT Football Team (2024)
- Best Player, 2nd Division Football Tournament, Faridpur (2022)
